PHASE 8 – PROJECT DEMONSTRATION

Streamlining IT Procurement: Automating Standard Laptop Orders

1. Demo Introduction

“Good morning everyone. Today, I am going to demonstrate our project.

The name of our project is Streamlining IT Procurement: Automating Standard Laptop Orders.”

2. Purpose

“The main purpose of this project is to automate the procurement process for ordering standard laptops.

This helps to reduce manual work and process laptop requests quickly and in an organized way.”

3. Benefits

“This project reduces manual work, saves processing time, reduces human errors, and makes the laptop procurement process easier to manage.”

4. Working Demonstration

“Now, I will demonstrate how our project works.

First, the user submits a laptop request.

The user enters the required details and submits the request.

After that, the system validates the request and processes it according to the standard laptop requirements.

The IT or procurement team can manage the request and update its status.

In this way, the standard laptop ordering process is automated.”

5. Final Output

“This is the final output of our project.

Using this system, the standard laptop procurement process becomes simple, fast, and organized.

Thank you for watching our project demonstration.”
